GUNA is a Sanskrit term which means "all life energies of living beings". A parallel can be drawn between the essence of this ancient word and GUNA's international reputation for leading edge science and medical advancement. A hallmark of GUNA's commitment to scientific innovation is both Research and Development and medical education within the Academic community in various well-known Universities, first of all the State University of Milan (Università degli Studi di Milano). This cornerstone of GUNA's vision ensures that the company is and will be on the forefront of integrative medicine – thereby providing the most advanced medical treatment concepts and products available today.

Guna Laboratory is certified according to the international GMP (Good Manufacturing Practice) regulations and UNI EN ISO 9001:2008 (Quality Management System) standards.

## Volumizing & Remodeling

dermocosmetic cream  
with *pueraria mirifica* extract  
for breast and décolleté skin

Women cannot be truly happy unless they are content with their figure and shape.

Femininity comes mainly from woman's breasts and **breast size** is sensitive issue for many women and can have a profound effect upon their **confidence, sense of attractiveness** and **overall happiness**. A woman should be proud of her figure and should dress to feel comfortable and attractive.

Some women are naturally endowed with large and firm breasts. However, **millions of women do not attain their full breast size**. Yet, many women are dissatisfied with their breasts because these are **naturally smaller** or they have **lost firmness** and **elasticity due to breastfeeding** or aging.

For years, women of all ages have been suffering embarrassment from having small or underdeveloped breasts. Many of them resort to risky and expensive surgery. **A little help may be necessary** for those who are not naturally endowed with fuller, bigger breasts **to enlarge the breasts naturally**.

Fortunately, **bioSENO** breast enhancement cream can help you to attain your full breast size naturally in 3-6 months.

**bioSENO** breast cream is a **100% natural product that is proven to be effective and without side effects**. It is **cheaper** and **safer than breast implants**, riskless (most people do not want to undergo surgery, to be anaesthetized or cut without good medical reason), yet **you can enlarge breasts naturally achieving 1 to 3 cup sizes in just 3 to 6 months**.

Formulated using the proprietary plant ingredient of **PUERARIA MIRIFICA** which is being hailed as the new "Miracle Herb". **GUNA** has developed a potent breast massage cream in cooperation with an expert in natural medicine, Dr. M. Li-Hod (Ph.D). It has been specifically formulated to maximize the effects of Pueraria Mirifica.

**bioSENO** breast cream can help you to lift your breasts, increase their volume and firmness. The effects are long-lasting.

**bioSENO**

breast cream is a natural beauty treatment, formulated to:

**firm, strengthen the breast, and add volume.**

It **expands the cellular substructure of the breast, increasing the size of the breast.**

It is **quickly absorbed,** and makes **the skin soft and smooth.**

It **rapidly and visibly increases the breast volume and weight,** giving a new satisfying feeling of fullness.

### HOW TO USE *bioSENO*?

Apply 1ml (1 pump) of cream onto each breast morning and evening by massaging them at the same time for 3-5 minutes in a gentle and circular motion.

### WHY MASSAGE?

Massage improves blood circulation in the area being massaged. An improved blood circulation maximizes the nutrients transported to the area being massaged. Massage aids the flow of nutrients to the breast areas that need to become fuller and more shapely.

### WHY IS CREAM MORE EFFECTIVE?

- The transdermal delivery system cream for breast enlargement is more effective than any other non-surgical product on the market for breast enlargement.
- While the effectiveness of capsules and pills diminishes while they pass through the digestive system, the active ingredients of the cream retain their optimal efficacy and potency. This happens because these ingredients are not volatile.
- While capsules and pills must be digested and travel throughout the body before reaching the desired areas, the active ingredients of the cream go direct to the desired enlargement area via our scientifically advanced transdermal delivery system cream.
- No indigestion nor other adverse side effects occur because the sensitivity of the digestive system is by-passed.
- The active ingredients of capsules and pills lose potency while being dried and prepared for encapsulation. Moreover, they are of lower quality compared to the ingredients normally used for processing transdermal delivery creams.

### Frequently Asked Questions

Here are some of the questions most commonly asked by our *bioSENO* breast cream users.

#### What is *bioSENO*?

*bioSENO* breast cream is a natural beauty treatment formulated to firm, strengthen the breast and add volume, without risk nor adverse side-effects, and with long-lasting results. *bioSENO* is a 100% natural herbal breast enhancement cream, quickly absorbed and gives fast and visible results to breast shape and size in a very short time.

#### What does it contain?

All the ingredients of *bioSENO* breast cream are of natural origin, such as Pueraria Mirifica root which is very rich in phytoestrogen, the natural plant-based estrogen and safe to use. This amazing herb has been traditionally used for centuries, passing down from one generation to another, for its properties to uplift and enhance breasts as well as to maintain a healthy hormonal balance in women.

#### How does it work?

The mechanism of action of *bioSENO* breast cream is a completely natural process similar to that that takes place during puberty. The secretion of female hormone, estrogen, plays an important role in mammary glands and is required to maintain the breast full. *bioSENO* breast cream has the highest concentration of phytoestrogen which is necessary for breast growth and is a natural way (alternative to surgery) to increase estrogen levels and achieve breast enhancement.

#### What makes *bioSENO* breast cream better than any other natural breast enhancement products?

*bioSENO* breast cream has been formulated to realize our goal to create maximum purity, potency and safety for breast enhancement treatment, using our manufacturing know-how to create a high-quality product that lives up to its promise. *bioSENO* herbal breast cream was designed and formulated specifically to maximize the effects of its main active ingredients. We selected high quality herbal ingredients with the highest concentration of breast-enhancing compounds and conformed to Good Manufacturing Practice and Quality Management System in production process, according to international norms.

#### Who will benefit from *bioSENO* breast cream?

Women over 18 years, who are dissatisfied with their breast size, with small underdeveloped breasts, suffering from embarrassment and who lost their self-confidence. Those women who want to have a more developed and fuller breast that their puberty denied them without resort to expensive breast augmentation surgery. Moreover, those women who are dissatisfied with their breast shape due to gravity or aging, which imply loss of firmness, sagging and loss of elasticity of the skin tone. *bioSENO* breast cream is a natural and safe alternative to breast augmentation surgery enabling to grow your breast size safely and to gain fuller, firmer and beautiful bust without surgery.

#### Can I use *bioSENO* breast cream without having harmful side effects?

All the ingredients in *bioSENO* breast cream are totally natural and safe without side-effects due to prolonged use. Its active ingredient plays a major role in the breast enhancement process, acts on the estrogen receptor sites, thus replacing estrogens. Safety is also increased by topical administration instead of oral administration which makes *bioSENO* breast cream safer in the long term to get healthy and beautiful breasts.

#### Who should not use *bioSENO* breast cream?

*bioSENO* breast cream is not suitable for women under 18 years. *bioSENO* breast cream should be avoided during pregnancy and breast-feeding. *bioSENO* breast cream is not recommended for women diagnosed with breast, ovarian and uterine cancer.

#### How long does it take to me to notice the effects of *bioSENO* breast cream?

Although there are individual differences, most women will experience tightness or a tingling sensation in the breasts within 4 weeks using *bioSENO* breast cream. The desired size could be attained within 3 months of use. However, some women may continue to increase their breast size after using the cream up to 6-12 months. For women over 50 years it may take a little longer. Just remember that we humans are all different and actual results will depend on everyone's body chemistry. It is important to measure breast size carefully before starting to use *bioSENO* breast cream and compare results after 3-6 months. However, we recommend you to use it for 6 months or least to obtain best and long-lasting results. Results are not instant. However, you will notice a visible difference if you are patient and you follow the directions carefully.

#### Do I have to keep on using *bioSENO* breast cream even after achieving desired results?

After attaining the desired size you should continue to apply *bioSENO* breast cream for another 3 months to maintain breast size and firmness in the long term.
