

Omega Formula™

Chewable tablets

FOOD SUPPLEMENT

New Flavour
Chocolate

Description

The special formulation of Omega Formula™ helps protect the cardiovascular system thanks to its active principles synergy, in cases of: incorrect life-style, overweight, obesity, tendency to: hypercholesterolemia, hypertriglyceridemia, hyperhomocysteinemia.

Regular consumption of Omega Formula™, together with a balanced diet and a correct life-style, helps to:

- Maintain the appropriate ratio in the levels of LDL/HDL,
- Normalize the triglycerides blood levels,
- Balance the homocysteine levels.

With no side effects!

Key word:

protection of the cardiovascular system

Composition

Innovative and complete synergy of the Omega Formula™ composition:

Red yeast rice¹: it is obtained from the natural fermentation of rice (*Oryza sativa*) with a yeast, *Monascus purpureus*, which produces mevinolin and **monacolin K**: it has been shown that these molecules significantly help the reduction of LDL and triglycerides levels, with no side effects.

Monacolin K is a natural inhibitor of **HMG-CoA enzyme**, which is responsible for the mevalonic acid production, key reaction for the endogenous cholesterol production process.

Micronized seed of baobab fruit²⁻³: Its peculiar pharmaceutical technique allows its phytocomplexes, containing fibres, to remain unchanged and to keep a naturally balanced ratio between these phytocomplexes and **omega 3 - omega 6 - omega 9** and **phytosterols**. The intake ratio of polyunsaturated fatty acids is particularly significant, especially that of omega 6 which is electively involved in the reduction of LDL/HDL ratio.

Vitamin B6⁴: it is lacking in 30% of the elderly and its deficiency is associated with an increased cardiovascular risk: **the daily dosage of Omega Formula™ brings more than 200% of the average daily dose, helping to reduce cardiovascular risk factors.**

Folic Acid⁵: another important factor associated to the cardiovascular risk is the increase of homocysteine levels: recent studies suggest that a daily intake of folic acid through diet and food supplementation has preventive effects. **A daily dosage of Omega Formula™ brings 150% of average daily dose of folic acid.**

Cocoa⁶ due to its high polyphenols content, it has a protective activity on the cardiovascular system.

Omega Formula™

The unique synergy of Omega Formula™

RED YEAST RICE STANDARDIZED 1.5% MONACOLIN K

Balance of physiological levels of:

- LDL cholesterol
- Triglycerides

BAOBAB FRUIT SEED

• Natural contribution of polyunsaturated fatty acids $\Omega 3, \Omega 6, \Omega 9$ and vegetable fibres

VITAMIN B6 + FOLIC ACID + COCOA

• Hyperhomocysteinemia prevention
• Protection from oxidative stress

Directions for use:

Take a chewable tablet one to three times daily, according to the diet, during or just after meals. **To optimize the Omega Formula™ benefits, it is recommended to intake one chewable tablet daily, during or just after meals.**

Warnings

Keep the product cool and dry and protected from light. The best before date refers to properly stored and unopened packages. Do not exceed the recommended daily dose. Keep this product out of reach of children under 3. Food supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. An excessive intake may have laxative effects. Do not use during pregnancy, nursing or in case of lipid-lowering therapy.

Ingredients

Adansonia digitata L. (Baobab) micronized seed, maltodextrins, unsweetened cocoa powder (4%), red yeast rice (*Monascus purpureus*) e.s. tit. 1.5% in monacolin K, antiagglomerating agents: silicon dioxide, sodium carboxymethylcellulose, vegetal magnesium stearate, flavoring. Sweetener: sorbitol (from corn or wheat), sucralose; pyridoxin hydrochloride (vit B6), pteroyl-glutamic acid (folate).
