

# NEW STAMIBIO® CALMDERM

Fluid dermocosmetic cream  
for sensitive skins with a tendency to  
itching, reddening and cracking

STAMIBIO® Line is characterized by its unique and complete formulations, composed of a specific mix of selected protein extracts from **ROE EXTRACT** (Zebrafish eggs), active plant ingredients, active minerals and vitamins, useful to regenerate the **skin of face, body and scalp**.

The unique and specific formulation of STAMIBIO® CALMDERM moisturizes and soothes sensitive skins with a tendency to itching, reddening and cracking.

#### STAMIBIO® CALMDERM

has a fluid, non-oily texture, and is easily absorbed. Its soothing, nourishing and natural properties make it useful to treat the whole body, including the most sensitive areas.

#### STAMIBIO® CALMDERM

Specific dermocosmetic formulation with:

##### ROE EXTRACT:

selected protein fractions from zebra fish eggs; a great number of research studies showed its supportive action that contributes to the regulation and the rebalancing of the process of skin regeneration.

##### GLYCYRRHETINIC ACID:

extracted from licorice, helps the process of skin repair. It helps to calm and soothe the most delicate and sensitive skins, even in cases of irritation and reddening.

##### VITAMIN E:

essential for the well-being of the skin, it exerts an anti-aging action that supports the physiological processes of skin repair.

##### PROVITAMIN D:

useful support to protect, regulate and modulate the physiological regeneration of skin.

##### BOSWELLIA SERRATA:

its extract exerts an important calming and soothing action even on the most delicate skins with a tendency to irritation and itching.

##### LECITHIN:

from plant origin, with antioxidant properties. It exerts a nourishing and beneficial action especially useful in the treatment of dehydrated and sensitive skins.

##### ZANTHALENE:

extract from zanthoxylum Bungeanum, it has a significant soothing action that reduces itching.

**CALMING AGENT (SYMSITIVE):** it has a soothing action on the skin with a normalizing effect on the physiological conditions.
