STAMIBIO® SERUM

Specific dermocosmetic formulation with:

ROE EXTRACT:

selected protein fractions from zebra fish eggs; a great number of research studies showed its supportive action that contributes to the regulation and the rebalancing of the process of skin regeneration.

HIGH MOLECULAR WEIGHT HYALURONIC ACID:

improves skin firmness while maintaining the skin tone and preventing the formation of wrinkles.

INOSITOL:

stimulates cellular respiration, by activating all the processes of cell detoxification.

HOP EXTRACT:

contains a great number of antioxidant substances, which help the normal cellular balance.

COCOA EXTRACT:

counteracts free radicals and slows down cell aging.

GINSENG/GUARANA:

their plant extracts are useful for revitalizing and tonifying tired and aged skins lacking in elasticity and tone, helping to restore their energy and brilliance.

LOTUS EXTRACT:

contains substances with refreshing and antioxidant action on the skin.

HYDROLYZED DNA AND RNA:

compounds that contain a high amount of nucleic acids, and have a restoring and replenishing action.

MACA EXTRACT:

contains substances which help revitalizing the skin.

TRACE ELEMENTS:

have an energizing action on the skin, helping to improve its appearance and brightness.

ANTI-SPOT COMPLEX:

reduces skin spots due to aging, sun exposure and pollutants.
