Description

Breast is one of women's main symbols and can be considered one of the body areas that are first affected by the passing of time.

Changing of volume, loss of skin elasticity, tone reduction, all these conditions result from a complex etiopathogenic evolution due to a woman's constitution, endocrine aspects, metabolic characteristics, exogenous factors, i.e., free radicals action or dietary bad habits.

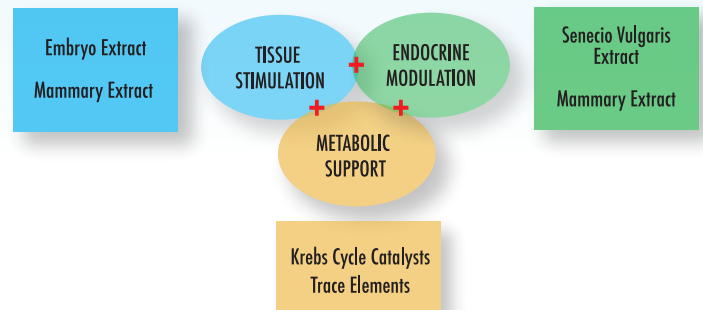

That's why the pathogenic complexity of breast slackening requires a specific and multi-targeted therapeutic approach (not based on surgery but on cosmetic treatment).

The unique and innovative characteristic of **Omeoformula® 4** is that its special structure includes a correct integrated, synergistic and complementary therapeutic strategy of the natural treatment of mammary ptosis.

Omeoformula® 4 acts on 3 different levels through:

- **Skin trophic** - stimulation by improving vascularisation and restraining aging processes (Embryo extract).
- **Metabolic support** to the oxidative phosphorylation processes thus allowing a higher production of ATP and hence an energetic support to start new protein syntheses.
- **Endocrine stimulation** through sensitization of prolactin and oestrogen cell receptors in breast.

BREAST TONING Cosmetic strategy – 3 points of attack

Uses

Breast revitalisation and toning.

Omeoformula® 4 gives good results with respect to premenstrual breast tenderness. For menopausal women an adjuvant treatment should be used to obtain the same results.

Contraindications: Mastopathy history, fibrocystic breast disease or breast cancer. In case of irregular menstrual cycles during the treatment, this must be stopped until the cycle becomes regular again.

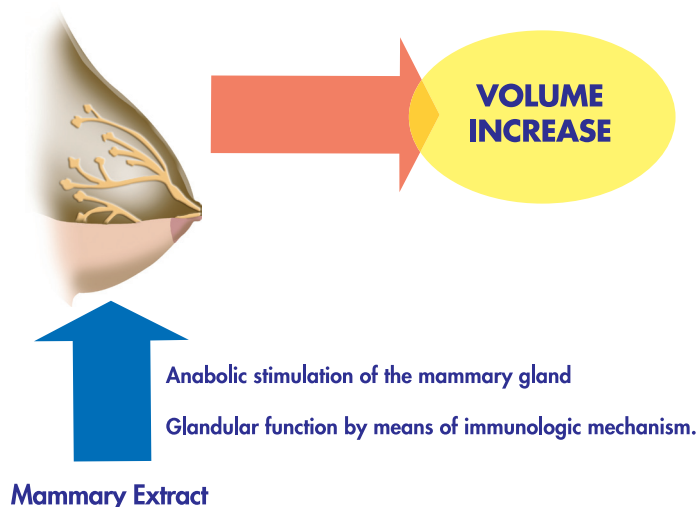

Ingredients

Aqua, Embryo Extract, Mammary Extract, Senecio Vulgaris Extract, Adenosine Triphosphate.

Omeoformula® 4

Mechanism of action of Omeoformula® 4

MAMMARY GLAND

An increase of prolactin level (even though this remains within its physiological range) induces an endocrine stimulation of breast functioning thus influencing breast volume and tone. This action is also enhanced by a simultaneous anabolic stimulation due to the organ preparation Mammary Extract, which acts as a carrier, by moving all the remedies contained in **Omeoformula® 4** to the breast. Embryo Extract performs an endocrine action by stimulating secretory function through an increased oestrogen activity leading to a breast volume increase.

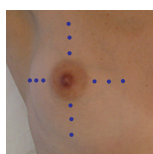

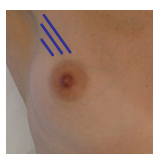

Directions

Apply **Omeoformula® 4** and **Gel Beauty** to the skin by using:

- magnetophoresis (**GUNAPHORESIS device**), iontophoresis, electroporation, ultrasound devices, electrophoresis,
- the micro-needling technique.

How to apply:

- from the clavicle down along the breast muscle with 3 parallel lines.
- from the areola go on with 4 lines radially (in the upper part, in the lower part, towards the medial side, towards the lateral side).
- in the area below the breast, along its insertion on the thorax.

The standard protocol consists of 1-2 session/s a week for 8-10 weeks.

For long-lasting results, 1-2 session/s once or twice a year is/are recommended.

Most common combinations

Omeoformula® 4 + Gel Beauty as a base for any cosmetic session to be mixed with:

+ **Omeoformula® 3**: breast lifting and toning.

+ **Made®**: anti-aging on the face for women aged between 45 and 70 years.

Packaging

Box of 10 x 2 ml ampoules/vials.

Box of 50 x 2 ml ampoules.
