

# Gel Therapy

**A preservative-free dermocosmetic conductive gel for professional use**

**"AIRLESS SYSTEM"**

**PRESERVATIVE-FREE**

**KEY WORDS:** Gel Therapy with natural active ingredients to be used as a base for pain management and skin care treatments with magnetophoresis (*GUNAPHORESIS* device), ionophoresis, iontophoresis, electroporation, ultrasound devices, etc.

## Description

**IT IS A DERMOCOSMETIC CONDUCTIVE GEL FORMULATION TO BE USED WITH OTHER GUNA PRODUCTS IN AMPOULES. IT IMPROVES THE ABSORPTION OF THESE LATTER INTO THE DEEPEST LAYERS OF THE SKIN.**

It has been expressly studied for a **professional use together with various techniques (magnetophoresis (*GUNAPHORESIS* device), ionophoresis, iontophoresis, electroporation, ultrasound devices, etc.)**. Its special formulation improves the absorption of Guna products for pain management and skin care (bruises, blows, scars) without injection from the very early treatments.

**Gel Therapy** can be mixed with Guna products in ampoules for pain management (Guna<sup>®</sup>-Handfoot, Guna<sup>®</sup>-Hip, Guna<sup>®</sup>-Ischial, Guna<sup>®</sup>-Lumbar, Guna<sup>®</sup>-Thoracic, Guna<sup>®</sup>-Shoulder, Guna<sup>®</sup>-Neck, Guna<sup>®</sup>-Neural, Guna<sup>®</sup>-Poly and Guna<sup>®</sup>-Muscle).

**Gel Therapy** is a product for topical use. The ingredients contained in its special and new formulation:

- help modulate any kind of pain
- have a skin care action
- help skin regeneration

**Gel Therapy** does not induce any thermal effect and promotes the spread of the signals emitted by the a.m. devices.

The "airless" pumping system of the new bottles allows the gel to be kept in a nitrogen environment without coming

- into contact with the external air;
  - the gel is not contaminated by the external environment; a better microbiological stability is guaranteed as it is
  - preservative-free;
- if the gel is correctly stored, its organoleptic characteristics remain unchanged.

The pumping system is extremely accurate and avoids any product waste.

## Ingredients

Aqua/Water/Eau, Propylene Glycol, Malpighia Glabra Fruit Extract, Xylitylglucoside, Anhydroxylitol, Xylitol, Glycerin, Capryloyl Glycine, Arginine, Lysine, Hydroxypropyl Methylcellulose, Human Oligopeptide-20, Sodium Chloride, Collagen, Ethylhexylglycerin.

## Directions and warnings

One dose of **Gel Therapy**, i.e. 1 ml approximately, can be used with 1 or more ampoules: mix them gently and then apply this cocktail to the area to be treated.

Keep the product in a cool and dry place and protected from light. For external use only. Avoid contact with eyes. In case of contact with eyes, rinse immediately with plenty of water for 2-3 minutes.

## Packaging

50 ml bottle with "Airless" system, 1,7 fl. oz.
