

GUNA® T

SINUS NOSE SPRAY

The formulation of GUNA® T SINUS NOSE SPRAY has been studied to free the paranasal sinuses from a surplus nasal discharge.

Description

The beneficial properties of GUNA® T SINUS NOSE SPRAY are due to its special ingredients with a very low mineral content as follows:

- **mineral spring water** containing **sodium chloride**, **bromine** and **iodine**
- **herbal extracts including:**
 - Althaea officinalis
 - Ribes nigrum
 - Pulmonaria officinalis
 - Echinacea angustifolia
 - Plantago major

Some medical monitoring has showed that a daily use of GUNA® T SINUS NOSE SPRAY helps:

- **Fluidify the nasal discharge.**
- **Eliminate the surplus nasal discharge.**
- **Reduce the nasal mucosa oedema.**

GUNA® T SINUS NOSE SPRAY can be used by pregnant women and children too. It has no side effects.

Each bottle is sealed so as to prevent any contamination from the external environment and to maintain the original properties of the mineral spring water it contains.

GUNA® T SINUS NOSE SPRAY can be considered as an **adjuvant treatment besides other pharmaceutical therapies. It has no interaction with other pharmaceuticals.**

How to take nasal sprays

1. Remove the bottle cap.
2. Spray with the nozzle into one nostril at first and then into the other. We recommend you to breathe in while spraying the product so that it can be absorbed more easily.
3. Wait for about one minute before blowing your nose gently to help eliminate the nasal discharge.

Directions for use

Adults and children more than 2 years of age: 1-2 sprays into each nostril 2-3 times daily.
Children less than 2 years of age: 1 spray into each nostril once daily.

Warnings

Keep out of the reach of children and at room temperature; use the product before the expiration date printed on the package. The yellow-brown colour shows that the product has been properly stored.

Medical device complying with the EU Directive 93/42/CEE.

Packaging

30 ml bottle.

Terme Rivanazzano

The water from RIVANAZZANO SPA (Italy): a precious resource for the respiratory system wellbeing.

A water containing sodium chloride, iodine and bromine flows out from the mineral springs of RIVANAZZANO SPA. This water is naturally hypertonic and absolutely special due to an excellent concentration of natural elements as follows: sodium, iodine and bromine, which are essential to help the respiratory system wellbeing.

At the level of mucous membranes, this special water regulates the nasal discharge by helping the mucociliary clearance as well as the elimination of foreign corpuscles and microorganisms.*

A daily cleansing of the nose with GUNA[®]T RHINO NOSE SPRAY helps:

- Cleanse the nasal mucosa
- Regenerate the nasal mucosa
- Improve the local tissue defences
- Regulate secretions
- Rebalance the mucociliary clearance. This promotes the removal of those corpuscles (bacteria, dust, etc.) that are potentially harmful.

**University of Pavia, Italy – Faculty of Medicine and Surgery – ORL Clinic*

Additional technical information: THE MUCOCILIARY CLEARANCE

The nasal mucociliary clearance is a non-specific immune mechanism through which the environmental impurities are entrapped in the mucous layer of the epithelium. The ciliary beat carries these impurities to the rhinopharynx so that they can be swallowed. When the nasal mucosa is somehow compromised, its activity is often reduced.
